Fleet Assessment Support Tool

Program Review IV

08 January 2003

Outline

- Accomplishments and Status

- January "To-Do" List

- Test Plan

- Discussion on Visit Data to be stored
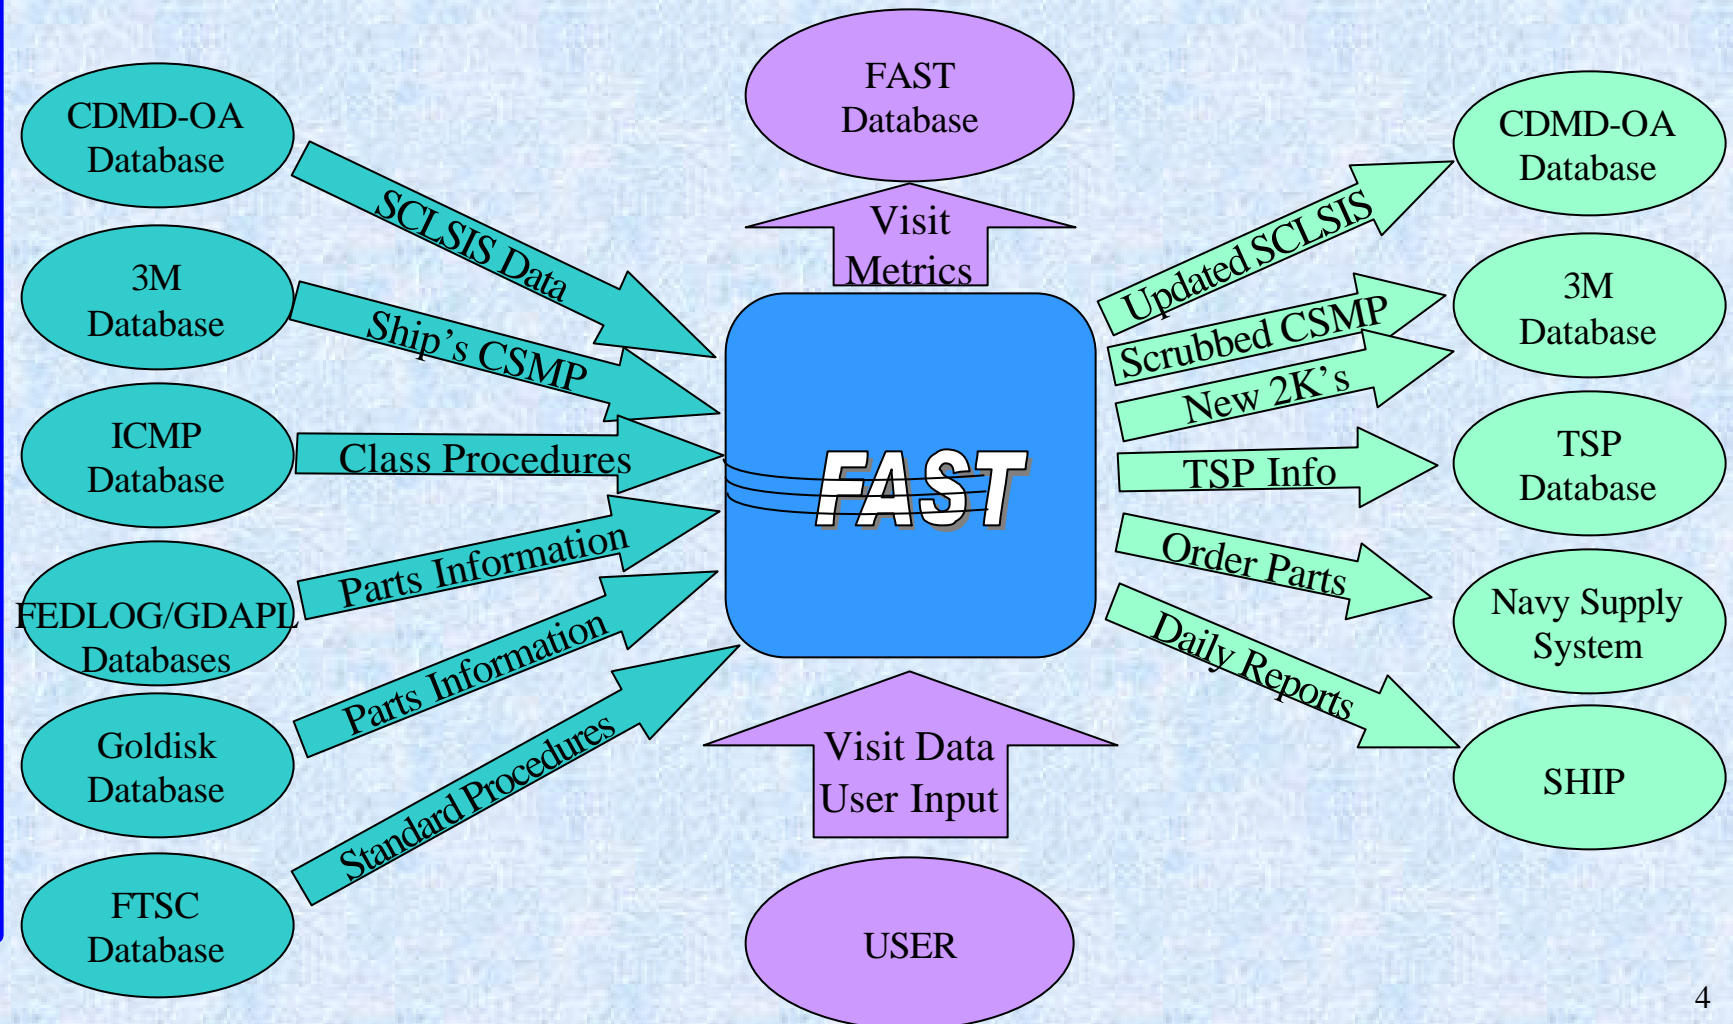

- Demonstration

Accomplishments and Status

- 6 of 7 Modules complete but not fully tested
- Working on getting FAST on FTSCLANT server
- Currently tailoring Visit Management module based on feedback
- 62% of Phase I requirements have been achieved-- working on the balance
- Placeholder in FAST Database for MRCs and standard problem statements

Program Overview

FAST

Program Overview

CDMD-OA Database	*SCLSIS Data*
3M Database	*Ship's CSMP*
ICMP Database	Class Procedures
FEDLOG/GDAPL Databases	Parts Information
Goldisk Database	Parts Information
FTSC Database	Standard Procedures

FAST Database

Visit Metrics

FAST

Updated SCLSIS → CDMD-OA Database

Scrubbed CSMP → 3M Database

New 2K's

TSP Info → TSP Database

Order Parts → Navy Supply System

Daily Reports → SHIP

Visit Data User Input

USER

January "To-Do" List

- Build Order Parts module
- Add MRC print capability to Visit Management module
- Add standard problem statements capability to 2K module
- Install FAST on FTSCLANT Server
- Tailor reports to users' needs
- Populate database with ICMP data
- Produce POA&M for FAST NMCI testing
